Assignment 1

Assignment Title: Create a static web page which defines all text formatting tags of HTML in tabular format.

Name: Trushita Sathe

PRN: 124B2B024

DIV: C

Objectives:

- To understand the concept of HTML text formatting tags.
- To learn how different text formatting tags affect text appearance on a web page.
- To design a static web page using basic HTML and CSS.
- To represent information in a structured tabular format.
- To provide reference links for further learning of HTML tags.

Outcomes:

- Identify and use common HTML text formatting tags.
- Create a structured HTML table.
- Apply basic CSS for styling web pages.
- Develop a static web page using HTML.
- Understand semantic and non-semantic formatting tags.

Theory Concept in brief:

HTML (HyperText Markup Language) provides a variety of **text formatting tags** that are used to control the appearance, emphasis, and meaning of text displayed on a web page. These tags help present content in a more **readable, structured, and visually appealing** manner.

Text formatting tags allow developers to highlight important words, show emphasis, indicate inserted or deleted content, and display mathematical or chemical expressions using subscript and superscript. For example, tags like `<b>` and `<i>` are mainly used for visual styling, whereas tags such as `<strong>` and `<em>` are **semantic tags** that also convey importance and emphasis to browsers and assistive technologies.

HTML also supports tags like `<mark>` for highlighting, `<small>` for reduced text size, `<del>` for deleted text, and `<ins>` for inserted text, which are commonly used in documents, articles, and change tracking systems.

Subscript (`<sub>`) and superscript (`<sup>`) tags are especially useful in scientific and mathematical representations.

Presenting these formatting tags in a **tabular format** helps users easily compare the tag name, its purpose, and the resulting output. Adding reference links further supports self-learning and documentation practices.

Dataset used:

No external dataset is used in this assignment.

The content is **static and predefined**, consisting of:

- HTML formatting tag names
- Their descriptions
- Example outputs
- Reference links from MDN Web Docs

Program code:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Document</title>
</head>
<style>
  body{
    font-family:'Times New Roman', Times, serif;
  }
  table{
    border-collapse: collapse;
    width: 80%;
    margin: auto;
  }
```

```

th,td{
    border: 2px solid black ;
    text-align: center;
    padding: 5px;
}
th{
    background-color: rgb(208, 239, 250);
}
tr:nth-child(even){
    background-color: rgb(233, 228, 228);
}

</style>
<body>
    <h2 style="text-align: center;">HTML Text Formatting Tags</h2>
    <table>
        <tr>
            <th>Tag</th>
            <th>Description</th>
            <th>Example Output</th>
            <th>Link</th>
        </tr>

        <tr>
            <td>&lt;b>&gt;</td>
            <td>Bold text</td>
            <td><b>Bold</b></td>
            <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/b">Click
Here</td>
        </tr>

        <tr>
            <td>&lt;strong>&gt;</td>
            <td>Important text</td>
            <td><strong>Strong</strong></td>
            <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/strong">Clic
k Here</td>
        </tr>

        <tr>
            <td>&lt;i>&gt;</td>
            <td>Italic text</td>
            <td><italic>Italic</italic></td>

```

```

        <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/i">Click
Here</td>
    </tr>

    <tr>
        <td>&lt;em&gt;</td>
        <td>Emphasized text</td>
        <td><em>Emphasized</em></td>
        <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/em">Click
Here</td>
    </tr>

    <tr>
        <td>&lt;u&gt;</td>
        <td>Underlined text</td>
        <td><u>Underline</u></td>
        <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/u">Click
Here</td>
    </tr>

    <tr>
        <td>&lt;mark&gt;</td>
        <td>Highlighted text</td>
        <td><mark>Marked</mark></td>
        <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/mark">Click
Here</td>
    </tr>

    <tr>
        <td>&lt;small&gt;</td>
        <td>Smaller text</td>
        <td><small>Small</small></td>
        <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/small">Click
Here</td>
    </tr>

    <tr>
        <td>&lt;del&gt;</td>
        <td>Deleted text</td>
        <td><del>Deleted</del></td>

```

```
        <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/del">Click
Here</td>

    </tr><tr>
        <td>&lt;ins&gt;</td>
        <td>inserted text</td>
        <td><ins>insert</ins></td>
        <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/ins">Click
Here</td>
    </tr>

    <tr>
        <td>&lt;Sub&gt;</td>
        <td>Subscript text</td>
        <td>H<sub>2</sub>O</td>
        <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/sub">Click
Here</td>
    </tr>

    <tr>
        <td>&lt;Sup&gt;</td>
        <td>Superscript text</td>
        <td>X<sup>2</sup></td>
        <td><a
href="https://developer.mozilla.org/docs/Web/HTML/Reference/Elements/sup">Click
Here</td>
    </tr>
</table>
</body>
</html>
```

Output screenshot:

HTML Text Formatting Tags

Tag	Description	Example Output	Link
	Bold text	Bold	Click Here
	Important text	Strong	Click Here
<i>	Italic text	<i>Italic</i>	Click Here
	Emphasized text	<i>Emphasized</i>	Click Here
<u>	Underlined text	<u>Underline</u>	Click Here
<mark>	Highlighted text	Marked	Click Here
<small>	Smaller text	Small	Click Here
	Deleted text	Deleted	Click Here
<ins>	inserted text	<u>insert</u>	Click Here
<Sub>	Subscript text	H ₂ O	Click Here
<Sup>	Superscript text	X ²	Click Here

Conclusion:

This assignment successfully helped implement the use of various HTML text formatting tags using a static web page.

By presenting the tags in a tabular format with descriptions, examples, and reference links, it becomes easy to understand their usage.

The assignment helped in improving knowledge of HTML structure, formatting tags, and basic CSS styling.
