Assignment 2

Assignment Title: Design a Personal Portfolio Page using HTML and CSS. Use bootstrap CDN if required.

Name: Trushita Sathe

PRN: 124B2B024

DIV: C

Objectives:

- To design a professional personal portfolio web page.
- To understand the use of HTML for structuring web content.
- To apply CSS for styling and layout customization.
- To use Bootstrap CDN for responsive design and UI components.
- To implement basic JavaScript for interactivity.
- To create a single-page portfolio showcasing skills, projects, and achievements.

Outcomes:

- Design a responsive and visually appealing personal portfolio.
- Use Bootstrap classes for layout, navigation bar, cards, and grid system.
- Implement smooth scrolling and hover effects.
- Add basic JavaScript-based text animation.
- Organize professional information effectively on a web page.

Theory Concept in brief:

A **personal portfolio website** is a static or semi-dynamic web application designed to digitally present an individual's academic profile, technical competencies, projects, certifications, and

contact information. It acts as an online professional identity and an alternative to a traditional resume.

HTML (HyperText Markup Language) is the standard markup language used to define the structural layout and semantic organization of web content. In this project, HTML is used to create structured sections such as Home, About, Skills, Projects, Certifications, and Contact, ensuring proper document hierarchy and navigation.

CSS (Cascading Style Sheets) is a stylesheet language used to control the presentation layer of a web page. CSS manages visual aspects such as colors, fonts, spacing, alignment, responsiveness, transitions, and animations.

Bootstrap is an open-source front-end framework based on HTML, CSS, and JavaScript that provides predefined responsive components and a grid system. It simplifies responsive web design by offering reusable UI components such as navigation bars, cards, buttons, progress bars, and icons. In this project, Bootstrap ensures mobile-friendly layout, faster development, and cross-device compatibility using its CDN-based resources.

JavaScript is a client-side scripting language used to introduce dynamic behavior and interactivity in web pages. In this portfolio, JavaScript is utilized to implement a typing animation effect for the name and professional title, enhancing user engagement and improving visual appeal.

By integrating HTML for structure, CSS for styling, Bootstrap for responsive design, and JavaScript for interactivity, this project demonstrates the development of a fully responsive, interactive, and professional personal portfolio website using modern web technologies.

Dataset used:

No external dataset is used in this project.

The portfolio contains static and manually entered data, including:

- Personal details
- Educational background
- Skills and proficiency levels
- Project descriptions
- Certification details
- Contact information

Program code:

About Me

I am a Computer Engineering student with a strong academic foundation and practical exposure via diploma in Information Technology from Government Polytechnic Pune.I am currently pursuing B.Tech in computer engineering from Pimpri Chinchwad College Of Engineering. I have demonstrated leadership, teamwork, and organizational skills through active involvement in technical and cultural initiatives as follows:

- 📍 Volunteer Secretary of **VISTA (IT Student Association)**, GPP, actively organizing student-centric technical events
- 👤 Technical Head of **PCCOE-ACM-W Student Chapter**, leading technical initiatives and collaborative projects
- 👤 Class Representative during **Second and Third Year Diploma** at Government Polytechnic, Pune (GPP), demonstrating leadership and coordination skills
- 📅 Volunteer for **annual cultural events (2023-2024)** at GPP, supporting event coordination and management
- 📍 Volunteer at **National Science Day 2024** events organized by IISER, showcasing enthusiasm for science outreach

Projects

"Abhilasha" – Divyang Scholarship Portal

A comprehensive e-governance web portal designed to digitize and streamline scholarship management for persons with disabilities, featuring application tracking and an administrative dashboard.

Snake Game

A classic Snake game developed in C++ using computer graphics, with an enhanced OpenGL-based 3D implementation later.

Viducate

An AI-powered educational video summarizer that extracts concise insights from YouTube videos for simplified learning.

Smart Road Sentinel

An IoT-based intelligent road safety system incorporating automatic street lighting, RFID-based secure access, driver drowsiness detection, and pedestrian safety.

Apna Bazar

A Java-based CLI E-Commerce application featuring cart management, order placement, and bill generation using stack and queue data structures.

Certifications

Java Masterclass

Completed Java Masterclass certification from Udemy, covering core Java concepts and practical programming.

[Download Certificate](#)

Generative AI for Beginners

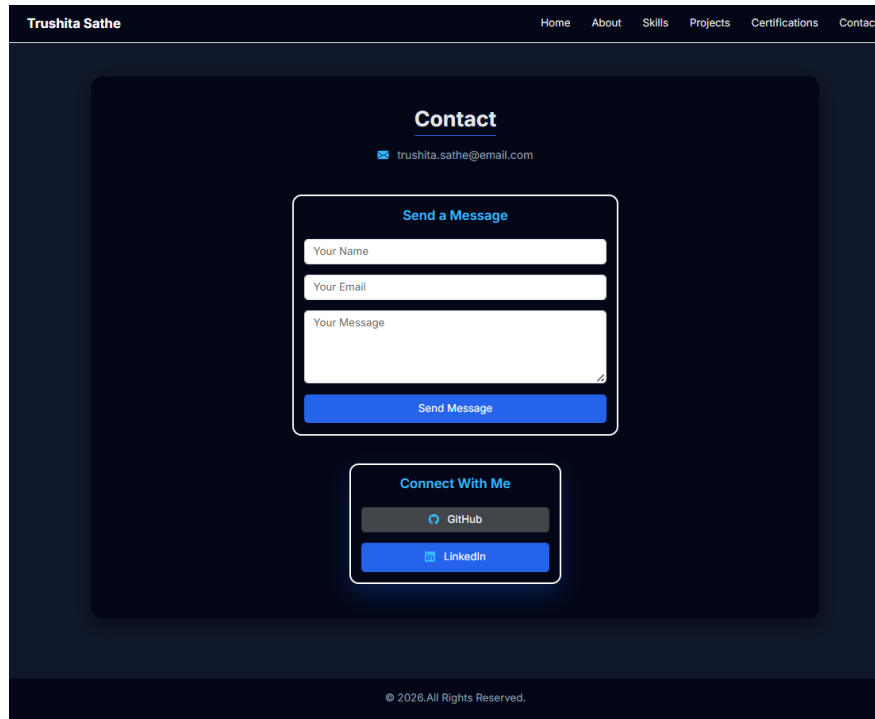

Certification from Udemy on Generative AI using ChatGPT and OpenAI APIs, focusing on real-world AI applications.

[Download Certificate](#)

Web Development Internship

Successfully completed a Web Development Internship through the EduSkills platform, gaining hands-on experience in web development technologies.

[Download Certificate](#)

Conclusion:

This assignment demonstrates the design and development of a personal portfolio web page using HTML, CSS, Bootstrap, and JavaScript.

The portfolio presents personal, academic, and technical information in a structured and professional manner. The use of Bootstrap ensures responsiveness, while CSS enhances visual appeal and JavaScript adds interactivity.
